

The most trusted name in professional coating technologies

Whatever type of boat you own, it deserves nothing but the best.

System X consistently provide unmatched paint protection, hardness and brilliance. A paint-protection system that utilises proprietary ceramic technologies, System X doesn't work merely as a layered application. Instead, it interlocks its molecular structure with the surface molecules of the paintwork to literally become the functional surface of the boat's paint and gelcoat.

The result is a semi-permanent ceramic coating that won't wash off like a wax, polish or sealant. System X exhibits outstanding resistance to friction, heat, pollutants and solvents – for a finish that locks in long-lasting beauty, as well as peace of mind.

The
ULTIMATE PROTECTION
for harsh marine environments

systemxaustralia.com.au

UV RAY PROTECTION

HIGH GLOSS AND APPLICATION VERSATILITY

A SHIELD AGAINST CORROSIVES

HIGHEST DEGREE OF HARDNESS

The **ULTIMATE PROTECTION** for harsh marine environments

INTERIOR

Ultrahydrophobic coating for fabric, leather, carpets and vinyl providing protection against day to day wear.

GLASS

Improved vision in wet weather. Protection from hard water staining. Glass looks newer for longer, not stained, etched or smeared.

GELCOAT OR PAINTED SURFACES

UV protection, resistance to salt water, friction and solvents. Oxidation and corrosion resistance. Easy cleaning of environmental or industrial contaminants.

STAINLESS STEEL

Easy to clean and maintain the shine of stainless steel surfaces.

Designed to offer the ultimate paint protection for boats and water vessels

The marine environment is unforgiving. The high corrosives of salt, UV rays, acids, alkalies, exhaust and algae/shell contaminants can cause structural and cosmetic damage that impair your craft's performance and ruin its appearance.

UV RAY PROTECTION

System X Marine Ceramic Protection provides maximum UV ray protection for paint, gelcoat, and stainless steel to prevent unsightly damage associated with aging and fading colours.

A SHIELD AGAINST CORROSIVES

From salt and exhaust to oxidation and sea life contaminants, the marine environment is characterised by elements and processes that induce corrosion. System X Marine Ceramic Protection treats surfaces like metal and gelcoat with water-resistant properties that prevent spotting and make cleaning dirt and debris fast and easy.

HIGH GLOSS AND APPLICATION VERSATILITY

System X Protection is highly effective on a variety of surfaces. Imparting a high gloss and bringing out the full luster and sheen of your boat's finish. Through its hydrophobic properties you're assured cleaning can be done easily without the use of abrasive chemicals and detergents. Save time and preserve your vessel with System X Marine Protection.

HIGHEST DEGREE OF HARDNESS

System X Marine Ceramic Protection registers over 9H on the industry's hardness scale – equating to a coating hardness that provides an exceptional level of paint protection.
