

The most trusted name in professional coating technologies

Whatever type of vehicle you own, it deserves nothing but the best.

System X consistently provide unmatched paint protection, hardness and brilliance. A paint-protection system that utilises proprietary ceramic technologies, System X doesn't work merely as a layered application. Instead, it interlocks its molecular structure with the surface molecules of the paintwork to literally become the functional surface of the automotive paint.

The result is a semi-permanent ceramic coating that won't wash off like a wax, polish or sealant. System X exhibits outstanding resistance to friction, heat, pollutants and solvents – for a finish that locks in long-lasting beauty, as well as peace of mind.

Products also available for Marine and Aviation

The
ULTIMATE PROTECTION
for harsh automotive environments

systemxaustralia.com.au

UV RAY PROTECTION

HIGH GLOSS AND APPLICATION VERSATILITY

A SHIELD AGAINST CORROSIVES

HIGHEST DEGREE OF HARDNESS

The **ULTIMATE PROTECTION** for harsh automotive environments

PAINTED SURFACES

UV protection. Resistance to friction and solvents. Oxidation and corrosion resistance. Easy cleaning of environmental or industrial contaminants.

INTERIOR

Ultrahydrophobic coating for fabric, leather, carpets and vinyl providing protection against day to day wear.

GLASS

Improved vision in wet weather. Protection from hard water staining. Glass looks newer for longer, not stained, etched or smeared.

ALUMINIUM & CHROME

Easy to clean and maintain the shine of aluminium and chrome surfaces.

Designed to offer the ultimate paint protection for any type of vehicle.

The automotive environment is unforgiving. The high corrosives of dust, UV rays, acids, alkalies, exhaust and other contaminants can cause cosmetic damage which can ruin your vehicles appearance.

UV RAY PROTECTION

System X Automotive Ceramic Protection provides maximum UV ray protection for paint, to prevent unsightly damage associated with aging and fading colours.

A SHIELD AGAINST CORROSIVES

From exhaust to oxidation and other contaminants, the automotive environment is characterised by elements and processes that induce corrosion. System X Automotive Ceramic Protection treats surfaces like metal with water-resistant properties that prevent spotting and make cleaning dirt and debris fast and easy.

HIGH GLOSS AND APPLICATION VERSATILITY

System X Protection is highly effective on a variety of surfaces. Imparting a high gloss and bringing out the full luster and sheen of your vehicle's finish. Through its hydrophobic properties you're assured cleaning can be done easily without the use of abrasive chemicals and detergents. Save time and preserve your vehicle with System X Automotive Protection.

HIGHEST DEGREE OF HARDNESS

System X Automotive Ceramic Protection registers over 9H on the industry's hardness scale – equating to a coating hardness that provides an exceptional level of paint protection.
